Entertainment and Farce.

The entertainment to be given in the vestry of the Universalist church Wednesday evening, January 22, will be as follows:

Piano duet, Mrs. Edith Carr and Mrs. Etta Eastman.

Vocal solo, Miss Lilla Morse.

Reading, Mrs. Heath.

Vocal solo, Mrs. Scott.

Reading, Blanche Tilden.

Piano duet, Mrs. Edith Carr and Mrs. Etta Eastman.

Cast for the Farce.

The farce, "The Champion of Her Sex," will then be given, with the following characters:

Mrs. Duplex (with money and a mission), Mrs. M. T. Paige.

Mrs. Deborah Harshorn, her mother, Mrs. W. P. Richardson.

Florence Duplex, her daughter, Maude Coburn.

Caroline Duplex, her step-daughter, Bernice Sanders.

Rhoda Dendrons, her friend, Clara Purree.

Pollie Noy, her friend, Mrs. Etta Eastman.

Kate O'Neil, the cook, Lizzie Murray.

Maggie Donovan, chamber-maid, Belle Nelson.

The doors will open at 7:30; entertainment will begin at eight. Admission, 15 cents.

Most disgusting skin eruptions, scrofula, pimples, rashes, etc., are due to impure blood. Burdock Blood Bitters is a cleansing blood tonic. Makes you clear-eyed, clear-brained, clear-skinned.

Itching piles provoke profanity, but profanity won't cure them. Doan's Ointment cures itching, bleeding or protruding piles after years of suffering. At any drug store.

If you haven't the time to exercise regularly, Doan's Roglets will prevent constipation. They induce a mild, easy, healthful action of the bowels without gripping. Ask your druggist for them. 25c.

Stops earache in two minutes; toothache or pain of burn or scald in five minutes; hemorrhoids, one hour; muscle ache, two hours; sore throat, twelve hours.—Dr. Thomas Electric Oil, mon-arch over pain.

Rank Foolishness.

"When attacked by a cough or a cold, or when your throat is sore, it is rank foolishness to take any other medicine than Dr. King's New Discovery," says C. O. Eldridge of Empire, Ga. "I have used New Discovery seven years, and I know it is the best remedy on earth for coughs and colds, croup, and all throat and lung troubles. My children are subject to croup, but New Discovery quickly cures every attack." Known the world over as the king of throat and lung remedies. Sold under guarantee at the Red Cross Pharmacy, Rickert & Wells. 50c and \$1.00. Trial bottle free.

GRANITEVILLE.

Victor Jode, I. O. O. L. M. U., will have a regular meeting Wednesday evening at 7 o'clock.

D. W. Flagg's Wonderful Moving Picture Co. will show at Miles' hall, Friday night, January 24, with all new pictures and new songs.

EAST BARRE.

D. W. Flagg's Wonderful Moving Picture Co. will show at the opera house Saturday evening, January 25, with all new pictures and new songs.

BACKACHE

or any other ache or pain is instantly relieved by

Sloan's Liniment

You do not need to rub. Just put it on—it penetrates and kills the pain. Good for Rheumatism, Neuralgia, Sciatica, Lumbago, Pleurisy, Stiff Neck, Toothache, and Frostbites.
Price, 25c, 50c, and \$1.00.
Dr. Earl S. Sloan, Boston, Mass.

WASHINGTON.

Mr. and Mrs. Lib. Hall were at Barre Saturday.

Mrs. Eleazer Smith of Northfield was a visitor in town the last of the week.

T. D. Hyland moved his family to East Barre, where they intend to live.

Dennis Tremblay is ill; his place was taken on the freight team Saturday by his father.

The infant son of Mr. and Mrs. Abe Clough died last week; also an infant daughter of Mr. and Mrs. William Sweet.

The Taylor Brothers have purchased of T. D. Hyland his place, known as the D. M. Flint farm, also the Hill farm. They are to move to the same this week.

G. H. Bigelow, E. E. Taylor and W. G. Rogers have made application to the state cattle commissioner to have their cattle tested and they expect to have it done this week.

Several applications have been filed for mail carriers for the new route, among them being F. E. Worthley, M. W. Hyland, D. S. Brown, Frank Bradbury, and others are contemplating sending in.

HOUSEHOLD HINTS.

Dip a piece of cheesecloth in kerosene and let evaporate; then use the cloth as a duster. It will take up dust without scattering it and polish at the same time.

Take an old teakettle and cut the bottom out and place over a stove heating on a gas or kerosene stove. The iron will heat much quicker, and it will save gas.

Instead of scouring the bottom of the dishpan when greasy wipe it off with a small rag dipped in kerosene. Burn the rag. Try it and see how easily the grease comes off, and your dishpan will never have a leak.

There is nothing better to keep the furniture bright than common coal oil. Dampen a soft cloth with it and rub all the varnished surfaces with it, including doors, casings, baseboards, etc., and they will always be fresh and bright.

TALES THEY TELL.

Secretary Shields of the water board in New Orleans has a spaniel that delights to catch bugs and take them to the yard for the chickens to eat.

A Sturgeon (Mo.) man says he sent his overalls to a laundry, forgetting to remove his watch. The watch, he declares, went through the wringer and continues to keep good time.

Mrs. Scholler of Manayunk, Pa., bought a life size marble statue of Venus, which was placed in the parlor. When her husband came home late at night he thought the statue was a burglar, and Venus was smashed.

A Greenfield (Mo.) citizen says that when his dog saw two preachers approaching his house he trotted around the corner and returned with two plump chickens, which he deposited near the door and then went to sleep.

MODES OF THE MOMENT.

Panels of very deep tucks are inserted at the bottom of evening gowns. The plain portion beneath the tucks shows embroidery designs.

Braid is seen everywhere on street and house costumes alike. Soutache and the flat silk braid of plain weave are preferred to more fancy kinds.

The return of the tailored shirt waist—and its return is assured—bespeaks for the trotter skirt the severest simplicity, as anything else naturally would be out of keeping.

Shaded satin and velvet have been revived and are being used for trimmings on cloths, as also are cords formed of silk and wound into fanciful border and other effects. In black this latter idea is particularly pleasing.—New York Post.

Market For Dried Locusts.

Quotations are invited by the Cape department of agriculture for the supply of dried locusts during the forthcoming season in bags of not less than seventy-five pounds net, delivered free on rail at the nearest railway station.

The locusts must be thoroughly dried before being bagged and the bags guaranteed free from earth or stones. It may interest our readers to know that two raisers of poultry in the Cape peninsula state that as a poultry food they find dried locusts most suitable if given in the warm mash. They then efficiently take the place of the imported American meat scraps and are much cheaper.—Rhodesia Herald.

Feet of the Ancient Greeks.

A walk through the British museum and a close examination of the pedal extremities of ancient art there show they are all about the feet. "The Disk Thrower," a celebrated specimen, has particularly bad examples of inelegant bunion joints. If the foot of the Parnassus Apollo, used as a model in most art schools, represents the foot of the average Greek corns and bunions must have been common in that classical country.—British Shoemaker.

IN LOCAL MARKETS

Dressed Pork Easy And Plenty

FRESH EGGS MORE PLENTY

While Butter Shows a Slight Increase

—The Dairy Product Is Bringing 28c and That of the Creamery 29@30c.

Barre, Vt., Jan. 22, 1908.

Dressed pork easy and plenty, fresh eggs more plenty while butter shows a slight increase.

Wholesale quotations are:—Dressed pork—7c.

Dressed veal—9@10c.

Native chickens—16@16c.

Native fowls—13@14c.

Dairy butter, firmer at 28c.

Creamery butter—29@30c.

Fresh eggs—28@29c.

Potatoes, quiet at 50c.

MILKERS QUOTED LOWER.

Ricker's Market Also Reports Hogs as a Bit Down.

St. Johnsbury, Jan. 22.—Ricker's market reports milkers as lower; cheap beef in demand and hogs 7c lower.

The receipts for the week ending January 20 were as follows:

Poultry—200 pounds, 8@9c.

Lamb—50, 3@4c.

Hogs—10, 4@5c.

Cattle—20, 3@4c.

Calves—125, 3@4c.

Milk cows—\$27@30.

EGGS ARE EASY AGAIN.

But the Boston Market for Dairy Products Is Unchanged.

Boston, Jan. 22.—The local market for dairy products, except that eggs have become easy again, is unchanged. There is still a scarcity of fancy fresh creamery butter and the little that comes forward finds a ready outlet at full quotations.

There also is a good firm market for fine storage goods, but the under grades of both fresh and held goods are dull. Cheese continues quiet but firm in the lack of large supplies. Eggs have weakened under a light demand, and in sympathy with outside market, rather than because of large arrivals.

Quotations follow:

Butter—Creamery, extra, Vermont and New Hampshire 30c, northern New York 30, western 29 1/2@30c, firsts, northern 27@28c, western 27@28c, eastern creamery, best marks 28c, fair to good 25@27c, storage creamery, extra 28 1/2@29 1/2c, firsts, 27@28c, dairy fancy 27@28c, common to good 24@26c, western imitation creamery 20@22c, western ladies 19@20c, parking stock 17@18c, renovated butter 20@22c, boxes and prints 23@31c.

Cheese—New York twins, fancy 15@16 1/2c, fair to good 12@14c, Vermont twins, fancy 15c, fair to good 11@14c.

Eggs—Fancy hennessy 30c, eastern fancy 28@29c, fair to good 26@28c, western fancy 26@27c, choice 25c, common to good 20@24c, dirties 13@17c, refrigerator stock 15@19c.

Note.—The above quotations represent the prices obtained by receivers for wholesale lots, and are not jobbing prices.

A WOMAN'S PROFITS.

Maine Poultry Experts Cleared a Little Matter of 130 Per Cent.

Near the little village of Damariscotta, Me., lives Mrs. Rufus Hitchcock, who finds both pleasure and profit in raising fowls.

Her husband while he runs a small dairy, willingly admits that his wife makes more money than he does, says the Country Gentleman. Many women feel that when they have performed their household duties they have neither the time nor strength left for outside work.

Mrs. Hitchcock took up poultry raising in order to divert her mind and give her an excuse for being out of doors for an hour or so every day. The poultry houses, two in number, are 5 1/2 by 10 1/2 feet and 4 1/2 by 10 1/2 feet each. While they are warmly built, there is nothing in the least fancy about them. There are no partitions in the houses, the fowls having the entire floor space.

In the flock numbers 470. In the larger house 240 hens and 17 cocks are kept, while in the smaller building are 200 hens and 15 cocks.

Mrs. Hitchcock believes in mashes, and feeds a warm mixture every day. In addition to this she uses oats and corn. The youngsters are started on a com-corn mash, which is fed for the first month. Then comes the mash, with cracked corn and rolled oats. All the hatching and rearing is done with incubators and brooders. The chicks are all hatched early and are allowed free range after the hay has been harvested in July.

Here, then, is a woman who, with a capital of about \$300, is able to sell yearly eggs to the extent of about \$950, while the hens sold fetch about \$300, and the chicks marketed add \$110 more; the total sales footing up \$1,360, while the early feed bill amounts to about \$500. Poultry certainly pays this woman well; \$810 on an investment of \$300 is better than any mercantile business ever does, unless it is some "get-rich-quick" scheme.

Waves of Water.

Ocean waves have often dashed over the tops of lighthouses.

Few New Yorkers are aware of the fact that the East river was known as the Salt river 200 years ago.

The Nile overflows its banks from July to October. This is due to the rainfall of the Abyssinian highlands.

The Mississippi, with the Missouri, is the longest river on the globe. The longest single river is undoubtedly the Amazon.

Without Ears, but Can Hear.

The New Jersey School for the Deaf has a pupil who, though without ears, is able to hear. The pupil is John Hetzel of Jersey City. Superintendent John Walker of the school is of the opinion that the lad's sense of hearing lies in his mouth. Where ears should be on the boy's head there are no holes, and the only resemblance to ears are small lobes.—Trenton Times.

AN ERA OF INVENTION.

The Wonderful Things Accomplished From 1876 to 1896.

A careful study of the history of mechanical progress convinces me that the inventive age attained the prime of its splendid career in the years inclusive of 1876 and 1896 and that in that wonderful period the practical development of a larger number of valuable ideas than any preceding era; also, that it is decidedly improbable that any future generation will approach its record. Before our optimistic friends scoff at this rather dismal prediction I will ask them to name some really great invention or discovery which has been announced since 1896. He may name scores of little devices, but if he will look into the facts he will likely find that all of them are based on the superb series of fundamental inventions and discoveries which marked 1876-96.

Suppose that those years were stricken out of mechanical and scientific advancement. What would the world be denied? The telephone, electric lights, both arc and incandescent; gas lights of high intensity and economy, electric railroads, wireless telegraphy, duplex and multiple telegraph, the typewriter, electric heating, all the innumerable forms of electric bells and signaling, automobiles, bicycles, motor cycles, motor boats, typesetting machines, the phonograph, high speed elevators, scientific cold storage and refrigeration, steel buildings which have revolutionized our cities—the list is far from complete, but those who are not properly impressed with this list may reflect that 1876-96 also added such lesser inventions and systems as cable railroads (now discarded), cameras and all sorts of photographic material suitable for popular use, air brakes, safety couplings, safety razors, smoke consumers, pneumatic tubes, electric photography, moving picture machines, the wonders of modern dentistry and the bewildering assortment of breakfast foods.

It will be urged that the principles of such inventions as the telephone, electric light, typewriter and other epoch making devices were known in advance of 1876. Admitted, but what of it? We now know the principle of extracting heat and power directly from coal without combustion and the consequent waste, but this fact will not detract from the credit of the man who solved the problem; if it ever is solved. None of the things I have enumerated was in practical operation in 1876.—Frederick Upham Adams in Appleton's.

THE HALL OF FAME.

The new king of Sweden is one of the best shots in Europe.

William T. Stead's latest hobby is the bacteriological regeneration of barren land in England.

Miss Cornelia H. Harriman, second daughter of E. H. Harriman, is announced to be engaged to marry Robert Livingston Gerry, son of Elbridge T. Gerry of New York.

Daniel Kelly of Mansfield, O., has all the windows and doors of his house wired and connected with a phonograph, which sings out when connection is broken. "Get out of here or I'll fill you with lead."

Vice President Fairbanks has appointed Senators Cullom and Bacon as regents of the Smithsonian Institution to all vacancies, and Speaker Cannon has reappointed Representatives Dargatzis, Mann and Howard as regents.

Mrs. Elizabeth Smith-Miller and Colonel Thomas Westworth Higginson are now the only survivors of the eighty-nine persons who signed the call for the first national woman's rights convention, which was held in Worcester, Mass., in 1850.

After thirty-six consecutive years with the Pullman company, George F. Brown of Chicago, sixty-four years old, treasurer of that corporation and recently its general manager, has retired. Mr. Brown entered the employ of the Pullman company in 1871. He has been retired on a pension.

Dr. William J. Rolfe, the eminent Shakespearean scholar and critic of Cambridge, Mass., recently celebrated the eightieth anniversary of his birth. While a teacher in Wrentham, Mass., he created the idea of an English department in schools and colleges, which has been universally adopted throughout the country.

Henry B. Seaman, who has become chief engineer of the public service commission of New York city, at a salary of \$15,000, is a self-made man, a product of the east side, New York, and is forty-six years old. He is six feet tall, powerfully built and is physically impressive. He comes of Quaker stock, being on his father's side a descendant of Elias Hicks, a noted Quaker preacher, while an ancestor of his mother was a brother of Oliver Cromwell.

An Alpine Feast.

Herr Walther of the Swiss Alpine club, after a score of failures, has succeeded in reaching the summit of a virgin peak named the Haute Tour, in the Glaric Alps, about 10,000 feet in height. This mountain has defied the efforts of Alpinists for many years, for the last 100 yards of the summit is black, slippery, perpendicular rock, affording neither hand nor foot holds, and one of the most difficult ascents in the Alps. Herr Walther took four hours to
